Dated: 15.01.2026

**Subject: Mandatory Laptops for February 2026 Semester: Transition to Active Learning****Dear Students,**

To align with global industry standards and the **G-SCALE initiative**, Galgotias University is transitioning to a hands-on "Active Learning" model. Developed in strategic partnership with **Nanyang Technological University (NTU), Singapore**, our G-SCALE initiative brings world-class pedagogical standards to your classrooms to maximize learning outcomes. Consequently, starting **February 2026, carrying a personal laptop to all classes is mandatory.**

**Why is this essential?** Laptops are now your primary tool for:

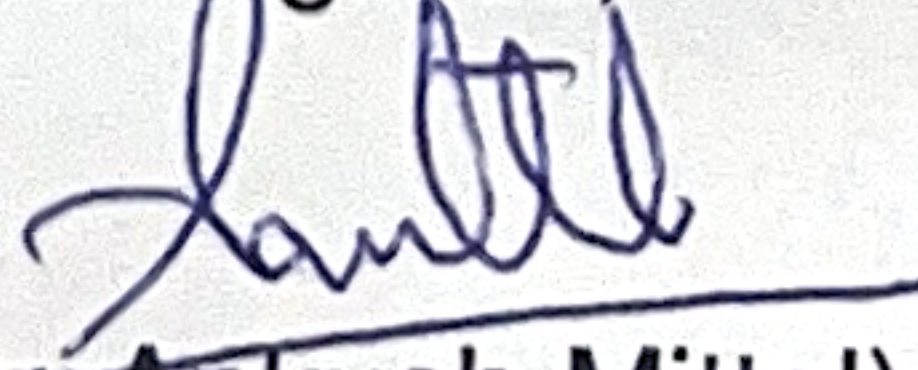

- **Live Problem Solving:** Real-time simulations and case studies.
- **Interactive Assessment:** In-class quizzes and collaborative projects.
- **Practical Application:** Instant integration of theory and technical skills.
- **Digital Engagement:** This requirement ensures you can fully leverage our state-of-the-art ecosystems and classrooms, which are specifically engineered for high-impact digital engagement.

**Attendance Policy Update :** Because classroom activities require digital engagement, **attendance will only be granted to students who have a functional laptop present.** To ensure verified engagement, attendance will be recorded exclusively via your personal laptop.

**Preparation for February :** Please ensure your device is in good condition, with necessary software installed and a reliable battery, before the semester begins. In case you have any query or need any assistance in this regard, please contact Office of Dean (Student Welfare).

We look forward to seeing you in February, ready to engage in this high-tech learning environment.

Best regards,

  
(Dr. Ankush Mittal)
