

Subject: Ensure Your Devices Are Ready for Class

Dear Students,

Greetings from **Galgotias University!** As we embrace technology in our learning environment, it is essential that you bring a **fully charged laptop or tablet** to every class session. Whether attending **theory lectures or computer lab sessions**, your device will be a vital tool for your academic success.

At **Galgotias University**, we are committed to fostering an innovative learning environment through **G-SCALE (Galgotias University Student-Centered Active Learning Ecosystem)**. This unique approach enhances your academic journey by promoting **interactive, technology-driven learning experiences** that prepare you for real-world challenges.

Your laptop will be required for:

- Accessing **course materials** on the **Learning Management System (LMS)** before and after class. The **LMS** serves as a **complementary tool** to facilitate your study, providing access to lecture notes, recorded sessions, assignments, and additional resources.
- Participating in **interactive activities** using tools like **Wooclap and Padlet** to enhance engagement.
- Collaborating on **group projects** and discussions in real time.
- Completing **online assessments** and assignments efficiently.
- **Practicing coding** on your personal device, ensuring you build hands-on skills beyond lab sessions.
- **Using a laptop for lab classes**, as tablets may not be suitable for coding and other technical activities requiring specialized software.

Additionally, **Padlet** will be an excellent resource for extending your learning beyond class hours. It allows you to:

- **Engage in discussions** and share ideas with classmates.
- **Access and contribute to shared resources** posted by instructors and peers.
- **Revisit important concepts** and clarify doubts by reviewing posts.
- **Collaborate on projects** seamlessly, even outside the classroom.

By integrating **G-SCALE**, we ensure that you experience an **engaging, student-centered, and technology-enabled** academic environment. This system empowers you to take charge of your learning, improve problem-solving skills, and prepare for a successful career.

To fully benefit from your coursework, ensure your laptop meets the **technical requirements** for all necessary software. If you have any concerns, feel free to reach out for guidance.

Let's make this a productive and interactive semester at **Galgotias University!**

Best regards,

Galgotias University
